

IRA

Rate Information:

The dividend rate and annual percentage yield may change every dividend period. We may change the dividend rate for your account as determined by the credit union board of directors.

Compounding and crediting - Dividends will be compounded every quarter. Dividends will be credited to your account every quarter.

Dividend period - For this account type, the dividend period is quarterly for example, the beginning date of the first dividend period of the calendar year is January 1 and the ending date of such dividend period is March 31. All other dividend periods follow this same pattern of dates. The dividend declaration date follows the ending date of a dividend period, and for the example above is April 1.

If you close your share account before dividends are paid, you will not receive the accrued dividends.

Minimum balance requirements:

No minimum balance requirements apply to this account.

Average daily balance computation method - Dividends are calculated by the average daily balance method which applies a periodic ratio to the average daily balance in the account for the period. The average daily balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period. The period we use is the quarter.

Accrual of dividends on noncash deposits - Dividends will begin to accrue on the business day you place noncash items (for example, checks) to your account.

Transaction limitations:

You may not make any withdrawals or transfers to another credit union account of yours or to a third party by means of a preauthorized or automatic transfer, telephonic order or instruction, or similar order to a third party.

Average daily balance computation method - Dividends are calculated by the average daily balance method which applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period.

The account until the maturity date stated on the account.

You may make withdrawals of principal from your account before maturity. Principal withdrawn before maturity is included in the amount subject to early withdrawal penalty.

You can only withdraw dividends before maturity. If you make arrangements with us for periodic payments of dividends in lieu of crediting.

Minimum balance requirements:

The minimum balance required to open this account is \$2,000 00

Average daily balance computation method - Dividends are calculated by the average daily balance method which applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period

Accrual of dividends on noncash deposits - Dividends will begin to accrue on the business day you place noncash items (for example, checks) to your account.

After the account is opened, you may not make additions into the account until the maturity date stated on the account.

You may make withdrawals of principal from your account before maturity. Principal withdrawn before maturity is included in the amount subject to early withdrawal penalty.

You can only withdraw dividends before maturity if you make arrangements with us for periodic payments of dividends in lieu of crediting

Early withdrawal penalties (a penalty may be imposed for withdrawals before maturity) –

- If your account has an original maturity of one year or less:

The penalty we may impose will equal 30 days dividends on the amount withdrawn subject to penalty

- If your account has an original maturity of more than one year:

The penalty we may impose will equal 90 days dividends on the amount withdrawn subject to penalty.

In certain circumstances such as the death or incompetence of an owner of this account, the law permits, or in some cases requires, the waiver of the early withdrawal penalty. Other exceptions may also apply, for example, if this is part of an IRA or other tax-deferred savings plan.

Withdrawal of dividends prior to maturity - The annual percentage yield is based on an assumption that dividends will remain in the account until maturity. A withdrawal will reduce earnings.

Automatically renewable account - This account will automatically renew at maturity. You may prevent renewal if you withdraw the funds in the account at maturity (or within the grace period mentioned below, if any) We can prevent renewal if we mail

notice to you at least 30 calendar days before maturity. If either you or we prevent renewal, dividends will not accrue after final maturity

Each renewal term will be the same as the original term, beginning on the maturity date. The dividend rate will be the same we offer on new term share accounts on the maturity date which have the same term, minimum balance (if any) and other features as the original term share account.

You will have a grace period of ten calendar days after maturity to withdraw the funds without being charged an early withdrawal penalty.
